

*Myriophyllum aquaticum*

- Glyphosate & TopFilm reduced biomass to 5% of pre-treatment value
- Glyphosate alone started to increase after 56 days

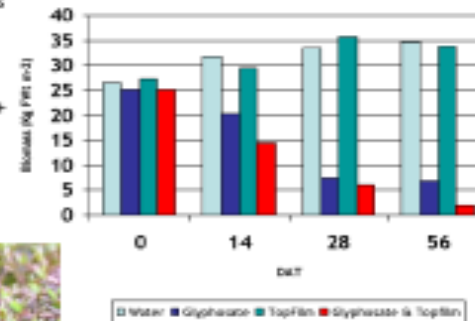

“Parrot Feather”

*Crassula helmsii*

- *Crassula* biomass reduced significantly by both Glyphosate and Glyphosate + TopFilm
- Greater loss of biomass with TopFilm

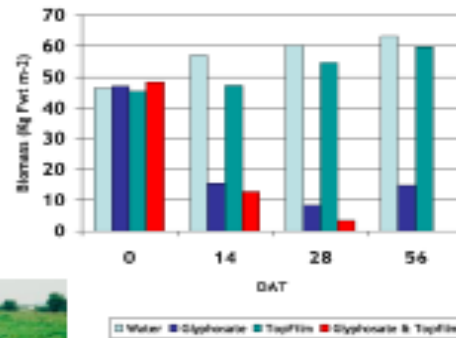

“Swamp Stonecrop”

*Hydrocotyle ranunculoides*

- Glyphosate shows usual yellowing and recovery
- Glyphosate + TopFilm eradicates completely

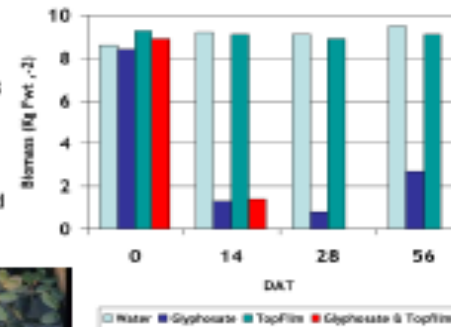

“Floating Marsh Pennywort”

*Potamogeton natans*

- *P. natans* show usual leaf loss and regrowth of floating leaves in 8 weeks with glyphosate.
- Leaves do not regrow with added TopFilm

“Floating Pondweed”
